## WATER BASED WAX FOR VENETIAN PLASTERS.

### FEAUTURES

An **all-natural** creamy wax, made using pure beeswax and castile soap melted in water.  
100% solvent-free.

Expressely created to waterproof, protect and give subtle shine to plasters  
(venetian plasters, lime plasters, marmorino). Thanks to its formula it is particularly suitable for  
damp rooms such as bathrooms and kitchens. This wax gives a velvety touch to your walls.

### USE

Stir well before use. If the wax is hard, place it next to a heat source until it  
gets creamy again. Spread the wax on the wooden surface using a sponge or a cotton  
cloth. Allow the wax to dry thoroughly (2/3 hours) and then buff with a woollen cloth.  
Smooth with energy until you reach the wished result.

Spread rate: 15-30 mq/lt
